```
Enter Address: 127.0.0.1
Pinging 127.0.0.1 using Python:

Sequence: 1, RTT: 0.00 ms
Sequence: 1, RTT: 0.00 ms
Sequence: 1, RTT: 0.00 ms
Sequence: 1, RTT: 0.00 ms
Sequence: 1, RTT: 0.00 ms
```

The first address would be localhost, here it is expected to have 0ms.

```
Enter Address: google.com
Pinging 142.250.205.238 using Python:

Sequence: 1, RTT: 6.00 ms
Sequence: 1, RTT: 6.00 ms
Sequence: 1, RTT: 2.00 ms
Sequence: 1, RTT: 8.00 ms
Sequence: 1, RTT: 1.00 ms
```

Next would be Google, the DNS resolved it to a server closest.

```
Enter Address: facebook.com
Pinging 57.144.228.1 using Python:

Sequence: 1, RTT: 7.00 ms
Sequence: 1, RTT: 9.00 ms
Sequence: 1, RTT: 9.00 ms
Sequence: 1, RTT: 8.00 ms
Sequence: 1, RTT: 7.00 ms
```

Similarly with Facebook, we can see the RTT consistently at this range.

```
Enter Address: wikipedia.com
Pinging 103.102.166.226 using Python:

Sequence: 1, RTT: 43.00 ms
Sequence: 1, RTT: 43.00 ms
Sequence: 1, RTT: 43.00 ms
Sequence: 1, RTT: 41.00 ms
Sequence: 1, RTT: 41.00 ms
```

Lastly would be wikipedia, which resolved with a far away host because of the higher ping.
